

3. capture and analyze IP packets using Wireshark

Aim: To capture and analyze IP packets and study their header fields and payload

Procedure

1. Open Wireshark
2. Select the active network interface
3. Start Packet capture
4. Generate network traffic by browsing or using the ping command
5. Stop the capture
6. Apply the filter

Lab Result

Thus IP Packets were successfully captured and analyzed using Wireshark, and the different IP address header files and packet payload were observed.
